Home Organization

Today's homeowners are increasingly design savvy and expect innovation and functionality in every room. Our extensive collection of home organization components are sure to satisfy even your most discerning clients. These versatile products are ideal for closets, home offices, garages, laundry rooms, mud rooms, entertainment centers, hobby rooms, pantries and more. Being organized has never looked so good.

Thermofoil Components

With an extensive selection of foils with matching backs, optional backside drilling and short lead times, our thermofoil products are ideal for your home organization projects. Our doors and drawer fronts are available in a variety of solid, gloss, metallic and woodgrain films, with and without glaze, in styles ranging from traditional to contemporary. We also offer a full line of accessories to create a beautifully finished appearance.

Surfaces

Home Surfaces from Northern Contours will convince you to move beyond boring square edge profiles. Our gently sloping profiles are ergonomically superior, safer, and more pleasing to the eye. Selections include solids, woodgrains, shimmering metallics, abstract prints and new stone looks.

Portabella Series

Constructed with profile wrapped stiles and rails, our 5-piece doors offer true grain orientation and a designer look at very competitive prices. The Portabella Series provides the durability and uniform appearance of thermofoil with the traditional appeal of hard wood components. A complete line of accessories in exact matching foils are also available to customize your home organization projects.

Veneer Components

The clean lines of our Spectrum Series create a fresh look in any room. Sold unfinished or with a clear coat to emphasize their natural beauty, these contemporary style doors and accessories are available in straight grain Red Oak, Cherry, and Maple. Or, take a walk on the wild side with our new line of exotics featuring Caramelized Bamboo, Figured Anigre, Birdseye Maple, Black Walnut, Reconstituted Wenge and Reconstituted Zebrawood.

Wood Components

Our custom wood doors with veneer center panels provide impressive style while utilizing advanced technology. These panels offer a distinct advantage by eliminating the expansion, shrinkage and checking associated with hardwood panels. You're assured a uniform appearance because we hand select our veneer to color match their hardwood frames. Veneer also provides a consistent surface for finishing.

Your complete source

By continually providing unique, design driven products to the industry, Northern Contours has become your complete source for any home organization project. In addition to our extensive product listing below, we have true custom capabilities. Our engineers and designers specialize in finding solutions to your problems. We strive to make your job easier.
